

I support XM satellite radio 100%. I have a lot of money invested in this equipment for my car and I want to take full advantage of all the benefits the XM stations offer. I live in Atlanta and definitely want the traffic and weather services offered by XM Radio. Please don't let Lobbyist and the Broadcasters shut off this service that we pay for when we have XM Radio for we have a right to listen to information in any way we choose! Thanks.
